Section Title	Page Number
Virtual Machine : The Infrastructure Layer :	1
Inside the Infrastructure Layer :	1
Working of Infrastructure Layer :	2
Virtual Machine : Hypervisor Layer :	2
Inside the Hypervisor Layer : Virtual Machine :	3
Working of Hypervisor Layer : Virtual Machine :	3
So first : (Hardware Abstraction / Abstraction) :	4
Second : (Isolation) :	4
Third : (Resource Scheduling / Partitioning) :	4
Fourth : (Emulation) :	5
In Virtual Machine : App1 Layer :	5
Inside the App1 Layer : Based on actual software you want to use :	5

Based on building a web service :	6
Based on Software Functionality :	6
Working of App1 : Virtual Machine :	6
Isolation :	7
Self-Contained :	7
Virtual Machine : Guest OS Layer :	7
Inside the Guest OS layer : Virtual Machine :	8
Kernel :	8
Device Drivers :	8
System Libraries :	9
File System :	9
System Services :	9
Applications :	9
Each VM need its own Guest OS :	10

Working of Guest OS : Virtual Machine :	10
Therefore,	10
Virtual Machine : Bins / Lib Layer :	11
Inside : Binaries (Bins) :	11
Inside : Libraries (Lib) :	11
Importance : Libraries and Binaries Layer : Virtual Machine :	12
Working of Bins/Lib : Virtual machine :	13
Containers : Infrastructure Layer :	14
Containers : Infrastructure Layer : Inside :	14
Containers : Infrastructure Layer : Working :	15
Containers : Operating System Layer :	16
Containers : Operating System Layers : Inside :	16
Containers : Operating System Layer : Working :	17
Containers : Container Engine Layer :	18

Containers : Container Engine Layer : Inside :	18
Inside : Container Engine Layer : Containers :	19
Container Runtime :	19
Image Management :	19
APIs and CLI :	19
Resource Management :	19
Networking Setup :	19
Storage Management :	20
Therefore,	20
Container : Container Engine Layer : Working :	20
Therefore,	21
Containers : App1 : Layer :	21
Containers : App1 : Inside :	21
Containers : App1 : Working :	22

Comparison between Virtual Machines and Containers	22
Working of Virtual Machines and Containers :	23
Infrastructure Layer :	23
Hypervisor Layer :	23
Guest OS Layers :	23
Host OS Layers :	23
Container Engine Layer :	23
Bins/Lib Layer :	23
Application Layer :	24
Key points : Virtual Machine and Container :	24
Virtual Machine :	24
Containers :	24
Examples : Virtual Machine :	24
Containers :	24

Comparison between Virtual Machine Layers and Containers Layers : 25

Infrastructure Layer (The Physical Hardware): 25

Hypervisor Layer (Only in Virtual Machine): 25

Guest OS Layer (Only in VMs) : 26

Container Engine Layer (Only in Containers) : 26

Bins/Libs Layer : 27

App Layer : 27

One powerful machine are run by these Virtual Machine and Containers : 28

Using Virtual Machines : 28

Using Containers : 28
